56% Medication only

**44%** Both medication and in-clinic

Percentage of total clinics that offer abortion care beyond the first trimester of pregnancy that are independent.

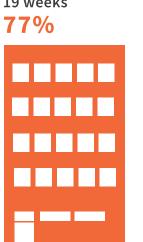

Care provided at & beyond 13 weeks

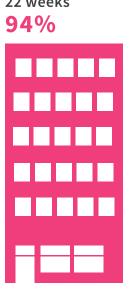

Care provided at & beyond 16 weeks **69%** 

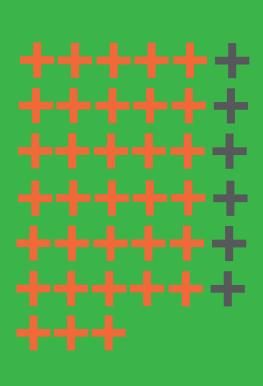

Care provided at & beyond 19 weeks

Care provided at & beyond 22 weeks

39 independent abortion clinics closed in 2018 & 2019. **85%** of these clinics provided care after the first trimester.

Gestational age (or progress through pregnancy) is often marked in number of weeks and days since the first day of the last menstrual period (LMP) or by trimester. For example, a person 12.6 weeks into pregnancy is 12 weeks and six days from their last menstrual period, though fertilization and implantation likely happened about two weeks after the last menstrual period.
